order since the Biffex-
file of Leap-year.

Being the second in
Lord Oct. 1626.

Prognostication
A
Chm. 1626.

A Prognostication.

continue hid with Clouds, it foreshewes raine &
specially, if his Rayes streke forth downward,
beholding, as it were, bearded: But if the beames
peake out in the midst, the outer Dybe being co-
vered with Clouds, great tempests of raine and
winde.

If the Clouds looke red when the Sun rises,
they betoken winde: if when it sets, faire weather
the day following.

If the Sun, when it sets, be hid under a dark
Cloud, it foreshewes of raine the day following:
if it raine, when the Sunne sets, rather winde:

together,
and the calling having time of raine
together, but forth in the evening,
together, calling in the morning, for
together, tempests.
ings, and watching the times (specially

From the Creation, to
 Flood, and from the Flood, to Abraham

A Chronologicall notation
 shewing how long it is since
 some memorable matters
 haue happened.

A Prognostication.

Names of marriage prohibited,
 in Verse.

Englished thus:

But this theore containing,
 But hath lets thee see againe,
 But hath from thee, late, thou may.

its signes, whereby to know
 what weather will follow.

When the Sun arises or sets bigger then
 it ordinarily shewes, it declares that
 some appeare better in the rising, there
 the same day, either winds of some
 to follow.

A Prognostication.

Signes of Weather from the
 Clouds.

See Clouds carried swift in a cleere aire,
 for winds from that part from which they
 arise. But if they gather round toge-
 ther, to the same approach to that part where
 they gather, they will beginne to disperse,
 toward, it becometh wind; if Southward,
 a cloudy day begins to cleare against
 which they blowes, it betokenes faire
 but when Clouds and blinde drins
 aine withen doubt.
 in the Sunne les, there arise blacke
 clouds, it portendeth Raine: if against the

Signes from the Eclipses
 Sunne and Moone, and the
 conjunctions.

The Eclipse of the Sun, be euer, in a
 mer, accompanied with faire weather,
 the Moon, with winde: seldom
 faire either of them,
 before and after the Sunnes conjunction
 other manner, look for faire weather.

Signes from the other Planets
 and Stars.

From other Conjunctions of the Planets
